

# Taric Query System Online

The Taric Query System Online offers you access to current information about duty rates, commodity codes, import and export regulations, exchange rates, Explanatory Notes and so on. The service is free of charge. To make use of its services, all you need is an Internet connection.

The system gives you access to both historic and future information. The central TARIC database of Swedish Customs is updated every night with data from the European Commission in Brussels.

In order to use the Taric Query System you must have an Internet connection. The system is adapted to the HTML version 4.0 and optimised for Internet Explorer 4.0 or later versions.

In the main menu news are presented along with the navigation of the application. A user manual is available in Swedish under the tab *Hjälp*.

The address to Taric Query System is  
<http://taric.tullverket.se>

The Taric Search System has the following main functions:

- Commodity codes for classification (Varukoder klassificering)
- Import Export
- Reports (Rapporter)
- Explanatory Notes (Varuhandböcker)
- Other (Övrigt)

## Commodity codes for classification

This part of the system contains a number of functions helping you to classify a commodity, that

is, finding the correct commodity code. The commodity code is then used to determine the correct charge or amount of duty and to find out if there are any restrictions concerning the commodity.

### Sections (Tulltaxans avdelningar)

Here you can move downwards in the hierarchy from section level to separate commodity codes. Terms are shown at all levels and you also have access to notes if there are any.

### Search for commodity code (Sök varukod)

Within a chapter, the commodity codes are arranged in different levels - indents. By means of the entry *Search for commodity code* the preceding and the subsequent commodity codes with code descriptions are shown in a structured way. You can navigate upwards or downwards within the structure until you find the correct code.

### Search for text (Sök text)

Here it is possible to search by means of a text in Swedish among the Customs Code commodity descriptions, the Explanatory Notes, the index and the list of *Duty-free pharmaceutical products*. The result of your search will be shown in a list of matching items.

## Import Export

This part of the Taric Query System contains a number of functions to present rates of duty and other types of import or export regulations.

## Commodity Code Details (Varukod detaljer)

By entering the commodity code, country, date and possibly an additional code you can get information about current rates of duty, national taxes, quotas, suspensions, preferential rates, import and export restrictions etc. This page is accessible in English by clicking on the Union Jack.

## Correlation table (Förändrade varukoder)

Information about new commodity codes and commodity codes that will expire or already have expired.

## Currency rates (Växelkurser)

Gives access to valid rates of currency, as published by Nordea as well as a currency calculator.

## Code list (Kodförteckning)

Information about abbreviations, types of footnotes, countries and regions.

## Meursing

Here you can find additional codes for agricultural products (EA), sugars (ADSZ) and flour (ADFM) by entering the product's content of milk fat, milk protein, sugar/invert sugar/glucose and starch/glucose.

## Reports

### History of measures (Åtgärdshistorik)

A possibility to create a report showing the measures applicable for a certain commodity code during a given period of time.

### Measures per regulation/Quota information (Åtgärder för förordning/kvotinfo)

A possibility to see the measures that are connected to a specific regulation and/or quota.

## Antidumping information (Antidumpningsinformation)

A possibility to see if there are antidumping and/or countervailing measures for a specific country or commodity code.

## Explanatory Notes

Under the tab *Varuhandböcker* you will find links to Explanatory Notes to the Harmonized System, Explanatory Notes to the Combined Nomenclature, (CNEN), in Swedish.

## Other

This menu presents useful links among others to the World Trade Organisation (WTO), the European Union law (EUR-Lex) and the Swedish authorities. There are also links to Swedish Customs publications and services coming in handy. The named links are as examples of the links you can find here.

### WTO quotas (kvoter)

A list of WTO quotas (World Trade Organisation). Only in Swedish.

### Quotas (kvoter)

Information about customs quotas and customs ceilings from the European Commission. It is possible to search for a specific quota or ceiling. You can also search by country or get a list of all current quotas and ceilings.

### Board of Trade (Kommerskollegium)

Information about antidumping and licensing.

### Board of Agriculture (Jordbruksverket)

Information about licences for import and export and also export refund.

### EUR-Lex

The website of the European Commission, where you can read and print out new regulations.

### Swedish Tax Agency (Skatteverket)

Information about excise duties.

## Advantages of the system

The system gives you access to all the information you need in order to provide us with correct information. All the information that previously had to be retrieved from many different places, can now be found in the system.

Access to the user-friendly query system is easy to obtain from the computer system of your business company, via the Internet.

The information history gives you correct infor-

mation that you can use in connection with applications for re-consideration, without having to contact us in each single case.
